

Version 7.1612

Date available on Pearson VUE Hosted Server: **December 22nd 2016**

Date available for Remote Deployment Installations: **Due to a defect not corrected until the next release, this release is not recommended for remote clients.**

 **Why is there a delay of releases for remote deployment installations?**
There is usually a slight delay of releases for remote deployment installations while code is compiled and packaged into an installer package.

 **Are any import templates affected in this release?**
There are no changes to import files in this release.

 This list is a summary of **planned** changes for the release and the final list of changes included may be different. Please check back **after** the release date for the complete list of changes included.

 **Patch Release** - Please see details below Updates and New Features.

Updates and New Features

Pages	Users Affected	Description	When does this happen?	Outcome	Type
Examine Questions	Writers, Reviewers, Manager	Comments changing order after making changes	When editing items, some comments were reversed order making it look like new comments were added and the old comments were removed when in fact they were just switched order on the Comments screen.	Corrected the application so that when items are updated, the comments will remain in the correct order.	Fix

View Exams	Managers	Translated Exams	When Clients create translated exams from a source English exam. It is time consuming to create exams manually when they are exact duplicates apart from the item language. Users need to be able to create language versions of a source exam by selecting the original exam, creating a copy with a new language code and swapping out the items with that language code.	<ol style="list-style-type: none"> 1. Adding cases to translated section report (case is not a section). 2. Translating a section - swap cases (case is not a section). 3. Translate exam - swap cases (both scenarios of case is a section and when the case is not a section). 4. Adding cases to translated exam report (both scenarios of case is a section and case is not a section). 5. Ability to clone section with cases. 	Enhancement
View Exam	Managers	Ability to add multiple items and sections to Exams.	Currently in ExamDeveloper a user cannot add the same item to multiple sections. The default behaviour for most clients is to not want an item to appear multiple times. However, this enhancement provides the ability to add multiple items and sections to Exams	<ol style="list-style-type: none"> 1. Add a project level setting to allow items to exist in multiple sections. This should not be allowed by default 2. Allow one or more section with the same items to be added to a test if the project level setting is set to allow the same item in multiple sections. 	Enhancement
Import	Managers	Import spreadsheet item in XML format	For allowing the ability to Review and Edit spreadsheet item once imported.	Provides the ability to import a spreadsheet item in XML format for reviewing and editing the item.	Enhancement
Set Standard > Evaluate Rating	Managers, Standard Setter	Provide accurate calculation for the range and average range when Setting Standard	When evaluating the rating, calculation should drop users with no rating and remove that user from count of users (for average calc). so that the average range is calculated based on the question ratings.	If the item was not rated, the final difficulty rating for it, now shows up blank instead containing a "0"	Update

Prepare Assets > Examine Asset	Mangers	Users unable to choose review states when changing asset state	Users are unable to select one of the asset review states when trying to change the state either through examining the asset or batching editing. Looks like this started in 1608. The behavior is also incorrect in 1609	Asset state as per configuration can be changed from examine assets and batch edit	Update
Manageltembank> ItemSimilarity tab OR Manage>Project Bank>Item Similarity	Item Bank Manager, Project Manger	Item Comparison search should be excluding items in the the following states: Draft, Rejected, Imported, and Obsolete	The following item states are not expected to be included in the Item Similarity results: Draft, Rejected, Imported, and Obsolete	Draft, Imported, Rejected and Obsolete state questions are excluded from similarity score comparison	Update
Manage Item Bank>click Edit Criteria link		User unable to make changes to Item Comparison criteria when 'Enter specific words' text box is empty	If adding "stop" words to the item comparison "specific words" text box, save the configuration, Later unable to remove the "stop" words and save the configuration with an empty text box. WorkAround: Replace the word with a space and click Save	"Stop" words from the "enter specific criteria" are removed when words are deleted by user and user selects "stop" word list as option for configuration	Update
Viewing Item within Test Driver	Item Bank Manager	PDF doesn't expand along with pop-up window when resizing	When a PDF is attached as a pop-up exhibit there is a material tag that is generated in the QTI during export that seems to prevent the PDF from expanding when the pop-up window is expanded. After removing this material tag the PDF does fully expand with the window.	Extra <mattext/> not exporting in itempool.xml. Split-screen exhibit also worked as expected within Test Driver.	Fix

Patch Release 7.1612.0.6

Pages	Users Affected	Description	When does this happen?	Outcome	Type
-------	----------------	-------------	------------------------	---------	------

Athena Test Driver	Managers	Drag and Drop token y-values not generated in A, B, C, D order	Reviewing the QTI generated from Test Driver the tokens come out in the correct label order. However, the y position values are not in order.	Issue was an outlier situation and Drag n Drop tokens are now displaying in order as expected in Test Driver.	Fix
