

# Chapter 5 - Manage Projects

As Project Manager, you are responsible for **setting up** and overseeing progress of the project including:

- **Configuring project parameters**
- **Creating an exam blueprint**
- **Managing the roles in the project, users, and their assignments**
- **Improving the quality of exams**
- **Reviewing the Items**

With the Project Manager tools, you can **generate a variety of reports** and customize your project in the following ways:

- **Import data to the project**
- **Customize the menu page**
- **Change a project deadline and status**
- **Create a custom dictionary for your project**
- **Improve the quality of items using ExamAdvisor™**
