

7.4.5 The Question Metadata Tab

The **Question Metadata** tab on the **Observe Questions** page displays metadata details of the retrieved item, such as the Blueprint ID and Question ID.

The **Observe Metadata** page has the following features:

Field	Details
Question ID	The Question ID of the item.
Revision Code	The revision number of the item.
Blueprint ID	The Blueprint ID of the item.
Other Blueprints	The other Blueprints of the item. This is populated when the item has Blueprint ID from another project.
Translation group	The translation group number for the item.
Language	The language assigned to the item.
Translated questions	The languages into which the item has been translated.
Metadata	The custom metadata associated with an item.
References	The references supplied for the item.
Membership (exams, sections, enemies, etc.)	Opens pop-up window and identifies, enemies, in which projects the item is editable and viewable, the exams, sections, and collections to which the item belongs, split screen and popup exhibits to which the item belongs, and the title for the item.
Average Quality Rating	The average of the Quality Ratings assigned by various users to the item.
Average Angoff	The average of Angoff Ratings assigned by various users to the item.

Clicking the **Membership (Exams, Sections, Enemies, etc.)** link opens a new pop-up window detailing its membership on various data structures in ExamDeveloper.
