

6.3 Reports

As an Item Bank Administrator, you can generate a variety of reports.

Reports can be generated on:

- Items and parts of items
- Item Bank data
- Statistics such as Candidate Scores and Problematic items
- Assignments
- User Audit

You can also view a snapshot of the status and progress of each user within the item bank. The **Status** section provides a snapshot of the status and progress of projects within the Item Bank. These reports show detailed information about the amount of work contributed by users on all projects in the Item Bank.
