

6.3.1.2 Item Bank Tab

The **Item Bank** tab allows you to view the Reference Report, retrieve files related to the Item Bank, and check the Media List.

The **Item Bank** tab contains the following features:

Option	Description
Reference Report	Click to generate a report of the references associated with the item Bank.
Filter By Exam Form	Choose the exam form, for which the Reference Report must be generated.
Format References	Format the references for the exam form. This opens the References tab in the project Configuration page.
Reference Usage Frequency	Displays the number of questions for which the references have been used.
Get All Assets	Downloads a ZIP archive containing all the assets in the Item Bank.
Media List	Displays a window with a list of all the assets available for the Item Bank, along with the details of the date uploaded, and the items to which the assets are attached. The file can be saved.

Pop-ups must be enabled to be able to view the media list in your browser.
