

Version 7.1710

Date available on Pearson VUE Hosted Server: **October 26th 2017**

Potential date available for Remote Deployment Installations: **November 10th 2017**

Why is there a delay of releases for remote deployment installations?

There is usually a slight delay of releases for remote deployment installations while code is compiled and packaged into an installer package.

Are any import templates affected in this release?

There are no changes to import files in this release.

This list is a summary of **planned** changes for the release and the final list of changes included may be different. Please check back **after** the release date for the complete list of changes included.

Please be sure to review the Known Issues page to see a list of any continuing defects seen in the application [HERE](#).

Enhancements

Pages	Users Affected	Description	When does this happen?	Outcome	Type
Review Comments	Project Manager	Functionality of reviewing comments has been removed	When navigating to Manage > Project Bank, the Comment link has been removed	Comments link removed	Enhancement
Write Question	Item Writers	Functionality for shuffle response has been relocated to the Advanced Properties.	When setting the shuffle response on a question this has been changed from a check box to a drop down and has been relocated to the Advanced Properties section of the Write Question page.	Shuffle response moved	Enhancement

Release Updates

Pages	Users Affected	Description	When does this happen?	Outcome	Type
Asset Manager and Asset Attach	Users with Upload Assets and Manage Assets permissions	Unable to upload or import assets containing an apostrophe in the filename.	An error occurs when users that are assigned the appropriate permissions attempt to upload or import assets containing an apostrophe in the filename.	Capability to upload or import assets containing an apostrophe is now functioning as expected.	FIX
Write Question	Item Writer, Item Reviewer and Project Manager	Content of multiple entry metadata is displayed as center aligned	Adding content to a multiple entry metadata is center aligned, rather than left aligned.	Content for multiple entry metadata is now left aligned.	FIX

Modify Question	Item Reviewer and Project Manager	Cursor moves when modifying block text metadata	When modifying existing block text metadata content or comments, the cursor randomly moves after initially specifying a cursor location to make modifications.	Cursor movement is proper when user modifies the "Block text Metadata" and "Comments" on Chrome.	FIX
Modify Question	Item Reviewer and Project Manager	Block text metadata running out of bounding box	When Block text metadata is added along with other metadata such as Drop down, Checkbox etc then User Interface is getting overlapped with each other	Block text, Drop down and Checkbox Metadata are appearing as expected.	FIX
Add/Edit Case	Item Writer, Item Reviewer and Project Manager	Unable to modify case text from modify question page	Attempting to modify the case stem text from the modify questions page the pop up appears and the loading icon appears in the top left of the popup, however never loads. User is then unable to make changes to the case text.	The issue was related to a Rich Text Editor when viewing with Chrome.	FIX
Add Collection	Project Manager	Exception occurs when searching from Add/Edit Collection Page	When performing this particular Search Criteria from the Add/Edit Collection's page the system generates an exception and the items are not retrieved. When you perform this search on the Search Questions page it executes as expected.	No longer receiving exception.	FIX

Project Bank	Project Manager	Examining items and viewing the membership window details, the system will return to last modified item	Selecting and examining a grouping of items, when the initial item's membership details window is viewed via the questions metadata and then closed upon review with no modifications made. Proceeding to the next item, either through the 'Next' button or drop-down list and selecting the 'Modify' button, the initial item displays rather than the next item selected. This occurs when selecting an item ID from the membership window of a given item.	Item modification using 'Next', 'Previous' buttons and 'Jump To' drop down are functioning as expected when items have an association with respect to belongs to exam form, exam section, collection, enemies, questions in other language, exhibits.	FIX
Custom Reports	Project Manager	Enemy IDs are getting duplicated in Custom Report	Items that contain enemy IDs are being duplicated when generating the Custom Report.	Enemy IDs are no longer duplicated on the Custom Report	FIX
Build QTI Package > Export	Project Manager	Unable to export External Items with — and – entities	External items that contain — or – entities are unable to be exported and an error will occur. <i>You are seeing this because an error occurred servicing the current request. Please quote the error described below when reporting the problem:</i> <i>An unspecified error has occurred. It is possible you may have been logged out of the system.</i>	QTI with external item having — and –, HTML and non-English language entities can be exported, compiled and viewed successfully.	FIX
