

9.1 Create Data Structures Under Project in DT Item Bank

A DT Item Bank project also has many of the same data structures as in a Standard Item Bank. It is possible to create DT Items (of certain types), upload assets, DT exam form templates, and DT section templates.

You can create these data structures under **Develop Questions**, **Prepare Assets**, and **Create Exam Form** menus. The **Create Exam Form** menu opens the **List DT Templates** page, where there are separate buttons to create DT Exam Form Template and DT Section Template.

Develop Questions | Prepare Assets | **Create Exam Form** | Manage | Observe | Manage Item Bank | View Item Bank
