

# 9.5 Create Exam Form Preview DT Template

In order to view all the item content similar to how a candidate sees the item in an exam, you must create a **Preview template**. For instance, if you add a calculator to an item you must add the calculator to the preview template or you will not be able to preview the item. You may also want to set the Global Font Override if your content uses a different font than the default font. You may also want to add section controls to your preview template. Once you create the template, you must also configure the **Item Preview Template** for the project.

1. Select the **Create Exam Form DT Templates** menu.
2. Click the Create Template **ExamForm** button.

3. This opens the **Create/Edit DT Template** page with a **Qti - Template** node containing a placeholder **ExamForm** node.

## Add Calculator to Preview template

1. **Right-click** on **Qt - Template** and select **PearsonApplication** from the pop-up menu.

2. Select the **Calculator type** check boxes for the type of calculator you want available for the exam and select what the default calculator will be if multiple types are selected. Click **OK**.

If you select more than one calculator type, a combo calculator is added. You must add all the possible combinations for each of the calculator types you might add to your items. This allows the specific calculator type to display properly in your item.

- Standard
- Scientific
- Graphing
- Standard & Scientific
- Standard & Graphing
- Scientific & Standard
- Scientific & Graphing
- Graphing & Standard
- Graphing & Scientific
- Standard & Scientific & Graphing
- Scientific & Standard & Graphing
- Graphing & Standard & Scientific

3. The calculator(s) you added are listed below the Qti - Template node.

## Delete calculator from Preview template

1. **Right-click** on the desired calculator node and select **Delete** from the pop-up menu.

2. Click **OK** to confirm the deletion. The calculator is removed from the Qti - Template node.

## Set Global Font Override

1. Click the **ExamForm - null** node. The **ExamForm properties** are displayed on the right panel.

2. Select the **Global Configuration** tab.
3. The default font and size applied to all text within an item is *Tahoma*, 9 pt font. Select the **Font face** and **Font size** your items will use.

## Add Section Controls

1. Expand the **ExamForm - null** node to reveal the **Section - Placeholder\_xxxx** node.
2. **Right-click** on the **Section** node and select **SectionprocExtension** from the pop-up menu.

3. Right-click on **SectionprocExtension** and select **PearsonvueSectionControl** from the pop-up menu.

4. Select the **PearsonvueSectionControl** node. The **PearsonvueSectionControl** properties panel opens on the right.

Click to edit DT Template.

## Apply Preview template to a project

Once you have created a preview template, you must apply it to the project.

1. Click the **Home** link on the navigation bar to return to the ExamDeveloper landing page.
2. Expand the desired **Item Bank** and click the desired **project** in the list.
3. Select the **Manage Settings** menu and select the **Configuration** tab.
4. Select the **Project** tab.
5. Scroll down to the **Item Preview Template** property and select your **Preview Template** from the drop-down list.
