

## 2.8.1 Information about an Item

The **Question Summary** section on the Validate Questions page displays the Question stem and Answer Options.

The screenshot shows the 'Question Metadata' section with the following details:

- Question ID: 753237
- Revision Code: 6
- Blueprint ID: 0 - Unclassified
- Other Blueprints:
- Translation group: 753237
- Language: English
- Translated questions:
- Documentation : Block Texts: This is my block text metadata
- Documentation : Multiple Entry Texts: Write, Edit
- References: <https://home.pearsonvue.com/> [Item] Computer Based Test development and delivery.
- Membership (exams, sections, enemies, etc.)

**i** If another user begins editing the item while you are validating the item, a message notifies you that, "**<first name> <last name> checked out item 12345 on MMM DD, YYYY at HH:MM.**" If the user checks-in the item without making any changes to the item, the message disappears.

The screenshot shows the 'Validate Questions' page for 'Project: Vikys Project'. A notification message is displayed: "Viky Turner checked out item 172851 on Feb 20, 2019 at 15:13." The page includes navigation buttons for '< Previous' and 'Next >', a 'Jump to' dropdown menu set to '1 (172851)', and a 'Question Summary' section with 'Type: MCQ, One Correct Option' and 'State: Validate'.

If the user modifying the item creates a new revision of the item, a message notifies you that, "**Item 12345 has been updated. Refresh the page to load the latest data.**"

Question Metadata | User Tracking | Comments | History | Advanced

- Correct answers are marked with an asterisk.
- If the item is assigned to a case, the **Belongs to Case** section is listed below the **Question Summary**.
- At the bottom of the page, the items are to be rated by Importance, Criticality, and Frequency, all on a scale from 0-4.

Along the middle of the page are five tabs: **Question Metadata**, **User Tracking**, **Comments**, **History**, and **Statistics**.

1. The **Question Metadata** tab displays information about the item such as the **Blueprint ID** and any custom metadata such as **Categories** and **Keywords**.
